## Report of Incident Notifications

Not responsive

**Region 5, BP Oil Spill, Whiting, IN:** On March 24, 2014, at approximately 17:25 local time, a sheen was discovered at the outfall of the BP Whiting refinery, in Whiting, Indiana. The waterway affected is Lake Michigan and the size of the sheen is almost 5,000 square yards. The facility deployed booms and contractors are on site to conduct the cleanup. The material is now contained, the release into Lake Michigan has stopped, and the 24 hours cleanup activities were initiated by the responsible party. EPA deployed an OSC to the site and met with BP, USCG, and Indiana Department of Environmental Management (IDEM) at the facility on the evening of March 24. EPA will continue oversight of the cleanup activities.
